

Students

INFECTIOUS DISEASES

The Governing Board desires to protect students from risks posed by exposure to infectious diseases while providing an appropriate education for all students. The Board recognizes that prevention and education are the most effective means of limiting the spread of infectious diseases.

Infectious Disease Prevention

The Superintendent or designee shall collaborate with parents/guardians and local health agencies and organizations to develop a comprehensive approach to disease prevention that promotes preventative measures and education of students and staff.

(cf. 1020 - Youth Services)

(cf. 3516 - Emergencies and Disaster Preparedness Plan)

(cf. 5141.21 - Administering Medication and Monitoring Health Conditions)

(cf. 5141.26 - Tuberculosis Testing)

(cf. 5141.3 - Health Examinations)

(cf. 5141.31 - Immunizations)

(cf. 5141.32 - Health Screening for School Entry)

(cf. 5141.6 - Student Health and Social Services)

The Superintendent or designee shall regularly review resources available from health experts to ensure that district programs are based on the most up-to-date information.

The Superintendent or designee shall ensure that the district's comprehensive health education program provides information about the prevention of infectious diseases, including the nature of bloodborne pathogens and their transmission, as well as information to help prevent the spread of contagious diseases, such as a pandemic influenza. He/she shall also ensure that each school has sufficient infection prevention supplies that are easily accessible to staff.

(cf. 6142.1 - Sexual Health and HIV/AIDS Prevention Instruction)

(cf. 6142.8 - Comprehensive Health Education)

Universal Precautions

Students and staff shall observe universal precautions in order to prevent exposure to bloodborne pathogens and to prevent the spread of infectious diseases.

(cf. 4119.42/4219.42/4319.42 - Exposure Control Plan for Bloodborne Pathogens)

(cf. 4119.43/4219.43/4319.43 - Universal Precautions)

Students

INFECTIOUS DISEASES (continued)

The Superintendent or designee shall inform students of the precautions to be used in cases of exposure to blood or other body fluids through injury, accident, or classroom instruction.

(cf. 5141 - Health Care and Emergencies)
(cf. 6145.2 - Athletic Competition)

Students with Infectious Diseases

The Superintendent or designee shall exclude students only in accordance with law, Board policy, and administrative regulation. Because bloodborne pathogens such as hepatitis B virus, hepatitis C virus, and human immunodeficiency virus (HIV) are not casually transmitted, the presence of infectious conditions of this type is not, by itself, sufficient reason to exclude students from attending school.

(cf. 5112.2 - Exclusions from Attendance)
(cf. 6164.6 - Identification and Education Under Section 504)

Parents/guardians are encouraged to inform the Superintendent or designee if their child has an infectious disease so that school staff may work cooperatively with the student's parents/guardians to minimize the child's exposure to other diseases in the school setting. The Superintendent or designee shall ensure that student confidentiality rights are strictly observed in accordance with law.

(cf. 4119.23/4219.23/4319.23 - Unauthorized Release of Confidential/Privileged Information)
(cf. 5022 - Student and Family Privacy Rights)
(cf. 5125 - Student Records)

Visalia, California

Students

INFECTIOUS DISEASES

The Superintendent or designee shall immediately report to the local health officer the presence or suspected presence of any communicable disease. (17 CCR 2508)

Universal Precautions in the Classroom

Before students work with blood, blood products, or other body fluids, the teacher shall explain the potentially hazardous nature of blood and body fluids in the transmission of various agents from one person to another and the specific procedures and safety precautions to be used in the lesson.

The following precautions shall be used when students are working with blood or other body fluids:

1. Before and after exposure to blood or other body fluids, students shall wash their hands with soap and water and cover any existing cut, wound, or open sore with a sterile dressing.
2. Students shall wear gloves or other personal protective equipment as appropriate.
(cf. 5142 - Safety)
3. Lancets and any other materials contaminated with blood or body fluids shall be discarded in a sharps container.
4. At the end of the class, surfaces shall be wiped with district approved disinfectant cleanser or a solution of one part bleach to 10 parts water.
5. Students or staff who are exposed to blood or body fluids to their mucous membranes of eyes, nose, mouth or an opening of their skin should immediately be referred to the school nurse for Blood Borne Pathogens Referral Procedures.
